## HISTORY OF OUR BUSINESS

### Peter Bohlender Stayed Home While Gold Miners Rushed West To Calif.

In 1849, Peter Bohlender, a poor, young immigrant from Bavaria with no formal education, began growing fruit trees near Dayton, Ohio. Although he founded Spring Hill Nurseries with the smallest of shoe string beginnings he soon became recognized as a leader in Horticulture. People found they could depend on his plants. These people told their friends and slowly but surely the fame of the nursery spread.

Today in 1951 we have one of the largest and most modern nurseries, producing over one million plants each year which are shipped to every state in the union.

W. F. Bohlender, son and H. N. Kyle, son-in-law, assumed active management for 33 years. In 1929 Tom Kyle completed his Horticultural schooling at O.S.U. and entered the business as production manager. In 1937 Tom and Howard Kyle, grandsons of the founder, assumed full ownership and management. For three generations now, 102 years, the business has been continuously operated. Each generation has had a natural love for plants and all grew up working in the fields.

**HARDY CHRYSANTHEMUMS**—We grow over 400 varieties of chrysanthemums, planting about 200,000 plants each spring. Visit us this fall and see acres of hardy mums in all colors, types, sizes and blooms. We are hybridizers but grow all the new introductions we can purchase.

## REGISTERED RASPBERRIES

Propagated by the Ohio Small Fruit Improvement Association. Almost disease free; every plant individually hand tipped, graded and dug by members of the Association under strictest inspection and regulations permitting 1% or less virus disease and not more than 1/4% of gall in parent plants. Bohlender does not recommend you purchase these extra quality plants unless you can plant them away from uninspected raspberries. An isolated patch with proper care will far outyield ordinary plants and remain healthy for years. We can supply Bristol, Logan, and Cumberland in registered plants.
